

THE STORY

Pete, Pat and Pauline were a pig, a donkey and a horse who decided to have a race. They wore the numbers 1, 2 and 3 on their backs and naturally finished first, second and third. Using the clues provided, logically deduce the animals' names, what numbers they wore and the order of finish in the race.

THE CLUES

1. In no case did the numbers on an animal's back match its order of finish.
2. The donkey finished ahead of the pig who was wearing #1.
3. Pete wasn't the pig, and Pauline wasn't the horse who won the race.
4. Pauline did not wear #1.

Pete	Pat	Pauline
pig donkey horse	pig donkey horse	pig donkey horse
#1 #2 #3	#1 #2 #3	#1 #2 #3
first place second place third place	first place second place third place	first place second place third place
